

Homepage Text Change

This is a very basic modification (as a teaser for customizer) to change the text at the top of the Activities Stream on the homepage.

Share Something: update your *status* or upload a *file*.

What do you want to share?

Welcome back Martti Garden. Would you like to: update your *status* or upload a *file*.

What do you want to share?

We start by taking the files on GitHub in this case:

<https://github.com/0x200h/DNUG/tree/master/homepagetextchange>

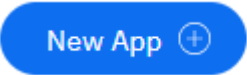

This file then needs to be deployed on the server – which as described in the working PDF is under “/pv-connections/customizations/”.

```
[root@pink hompagetextchange]# pwd
/pv-connections/customizations/dnug/hompagetextchange
[root@pink hompagetextchange]# ls
main.js
```

Next we go to the App Reg

<https://social.ibmcollabcloud.com/appreg/apps>

1. Click the new app button

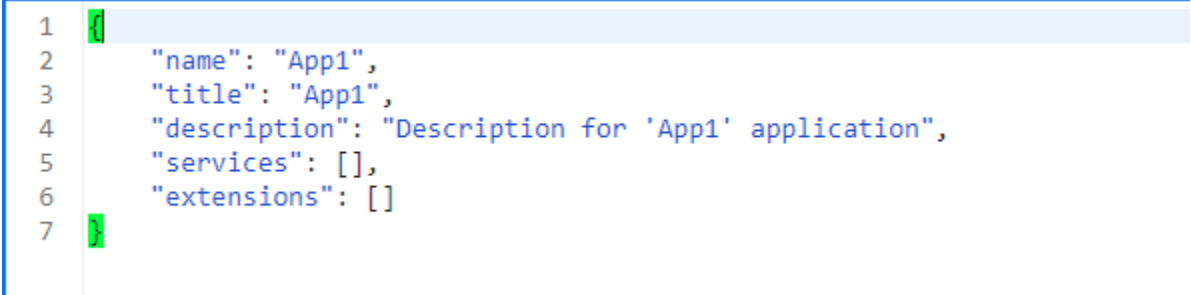

A blue rounded rectangular button with the text "New App" and a small white plus icon inside a circle.

2. Then the code editor

A blue rectangular button with the text "Code Editor" and a small white plus icon inside a circle.

Code Editor

3. Finally we put our definition in the code editor

A code editor snippet showing a JSON object definition for an application. The code is as follows:

```
1 {
2   "name": "App1",
3   "title": "App1",
4   "description": "Description for 'App1' application",
5   "services": [],
6   "extensions": []
7 }
```

For this example the definition is on the next page.

Using the file from the ssh console location we can then apply the app reg definition using the uploaded skeleton.

```
{
  "name": "Homepage Alternate Message",
  "title": "Homepage Alternate Message",
  "description": "Say hello to the user",
  "services": [
    "Customizer"
  ],
  "state": "disabled",
  "extensions": [
    {
      "name": "Homepage Alternate Message",
      "type": "com.ibm.customizer.ui",
      "payload": {
        "include-files": [
          " dnug/homepagetextchange /main.js"
        ],
        "match":{
          "url":"homepage"
        }
      },
      "path": "homepage",
      "application": "Homepage Alternate Message",
      "state": "disabled"
    }
  ]
}
```
